

REMARKS

At the time of the Fourth Office Action dated June 5, 2006, claims 1-14 were pending and rejected in this application. Claims 10 and 11 have been cancelled. Independent claims 1, 4, and 7 have been amended to clarify that the pre-defined window manipulation event is performed without activating the inactive open document window corresponding to the selected single one of said interactive user interface elements. Applicant respectfully submits that the applied prior art fails render, as obviousness, these particular limitations.

Applicant has made every effort to present claims which distinguish over the prior art, and it is believed that all claims are in condition for allowance. However, Applicant invites the Examiner to call the undersigned if it is believed that a telephonic interview would expedite the prosecution of the application to an allowance. Accordingly, and in view of the foregoing remarks, Applicant hereby respectfully requests reconsideration and prompt allowance of the pending claims.

Although Applicant believes that all claims are in condition for allowance, the Examiner is directed to the following statement found in M.P.E.P. § 706(II):

When an application discloses patentable subject matter and it is apparent from the claims and the applicant's arguments that the claims are intended to be directed to such patentable subject matter, but the claims in their present form cannot be allowed because of defects in form or omission of a limitation, the examiner should not stop with a bare objection or rejection of the claims. The examiner's action should be constructive in nature and when possible should offer a definite suggestion for correction.

To the extent necessary, a petition for an extension of time under 37 C.F.R. § 1.136 is hereby made. Please charge any shortage in fees due in connection with the filing of this paper, including extension of time fees, to Deposit Account 500563, and please credit any excess fees to such deposit account.
